

MY DREAM

My dream is to be doctor to help people.

There is very deep happiness in helping people who never know.

A doctor is next to god because he saves the life of peoples.

Being a doctor is very respectful.

There is nobody like doctor who saves people lives many times.

There are also other professions similar such as engineering, banking etc.

But doctor is professions in which people's blessing are always with him.

Doctors are needed everywhere in the world.

He cares for people good or bad health.

He always remains in people life.

He is like a hero.

People life is incomplete without a doctor.

I will be proud if I became a doctor in future.
